Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 29, 31-32, 35, 39-45 drawn to sodium salt of the compound of Formula III-1 and compositions thereof.

Group II, claim(s) 36-38, 46-48 drawn to methods of performing fluorescence imaging.

The inventions listed as Groups I and Group II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Ohno teaches compounds that fall within the generic claim 1 or render such claim obvious. Ohno at col 5-6 discloses water-soluble cyanine dyes comprising all features of the instant claims. Thus, Ohno breaks the unity of invention between Group I and Group II, because there is no single inventive concept or contribution to the prior art.

This application also contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Various Z¹ and Z²

Various Y

Various X

L¹ – L⁷

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply

Art Unit: 1617

must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

All claims correspond to the Species Z¹ Z², Y, X, L¹ – L⁷.

The following claim(s) are generic: 1.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: variations at the enumerated species recited above lead to compounds that do not possess the same physical, chemical or physiological features. Accordingly, each recited species renders the final product patentably distinct lacking the same or corresponding technical feature.

No telephone communication is made, because the requirement for restriction is complex. MPEP 812.01

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
